**NATURAL SOLUTIONS FOUNDATION:  
MUCH MORE THAN JUST TALK  
IMPORTANT HEALTH FREEDOM INFORMATION**

Sign Up to [Health Freedom eAlerts](http://www.healthfreedomusa.org/index.php?page_id=187)  
([http://www.healthfreedomusa.org/index.php?page\\_id=187](http://www.healthfreedomusa.org/index.php?page_id=187))

**PLEASE FORWARD WIDELY**

[We are resending our email from April 2nd since it contains important information and our email tracking system suggests some "problems" with deliveries... this is information "THEY" probably don't want you to see...but if you've seen this eblast already, please check the new material at the beginning of this eAlert.

Note: If Action Steps in the right hand sidebar or full text of email are not visible, scroll down to bottom of email and click "View Entire Message" or similar option on your email system.

**In This (Long And Very Meaty) Issue:**

- 1. Vital new information in this issue: blocked blog**
- 2. Original eAlert: Morgellon's Disease and GMOs**

**My God! What Have We Done? Part II**

Censored Againâ€

**We Must Be Doing Something Really Right and THEY Don't Like It One Bit!**

**Who are "THEY"?**

Well, THEY apparently run Blogger, owned by Google, or at least THEY have a pretty heavy hand on the throttle over there.

Do you remember Google's famous motto, "Don't do evil"? Here's a question for Google: is unconstitutional restraint of the First Amendment rights through anonymous censorship evil? Does it use power to create fear and short circuit the basic element of democracy, the free flow of information? I know my answer and I am willing to bet I know yours, too. To Thomas

Jefferson, an informed citizenry was the most fundamental requirement for democracy. He was right. THEY know that, so THEY apparently watch the "new media" very closely, indeed.

I want to tell you a story. It's not going to make you sleep very well, but you need to hear it anyway.

It's called "The Truth About Vaccination Lies and The Disappearing First Amendment" and its hero is our very own Ralph Fucetola, a trustee of the Natural Solutions Foundation and an attorney. But first, a little background.

### **There are things that the government does not want you to know.**

For example, the Justice Department has moved to seal the vaccine-related records of the nearly 1000 cases of vaccine damaged children now before the Special Master of the Federal Court that hears vaccine injury compensation cases. In the face of a stunning government concession that vaccination led to autism in a vulnerable child (Hannah Polling, see her father's letter [Here](#)), even with the obscene protection afforded to it by the Congress against law suits and liability, the huge vaccination industry has no wish to see the evidence circulate from highly documented vaccine injury cases. They might not face law suits as a consequence of that information, but who would allow their toxic brews to be injected into themselves and their children if they knew what those sad cases might reveal: that vaccines are far worse than a cruel hoax: they present known danger, a risk of unreasonable proportions, with no benefit other than the financial one to their purveyors. The insurance industry knows this; that is why you - and even Big Pharma - cannot insure against vaccine harm. It is an un-insurable risk. Solid information about the big vaccine lie is the last thing this powerful force wants revealed.

### **Enter Ralph, with Trusty Pen (Keyboard, Rather) in Hand**

Ralph authors the *Vitamin Lawyer Health Freedom Blog*, <http://vitaminlawyerhealthfreedom.blogspot.com/> in which he handles tough issues with clarity and precision, just as we strive to do in our Health Freedom eAlerts, our hard hitting videos on health freedom, our articles and our lectures. Like Ralph, we understand that *all* health freedom is related and we are willing to inform you, and deal with, all of the issues, no matter how fast they come at us (and the pace IS accelerating).

Ralph is known for his direct approach to freedom issues, just as is the Natural Solutions Foundation.

Last week, Ralph posted an article on health freedom and the big vaccine lie entitled, "Media Blitz Supports Big Pharma Vaccination "Big Lie" Propaganda." Click [Here](#)

(<http://www.healthfreedomusa.org/index.php?p=613>) to read it QUICKLY before what happened on his Blogger site, owned by Google, happens to the copy we posted! The piece exposes some of the falsehoods in a recent NY Times article and links that article to the many other recent MMD (Media of Mass Deception) pieces recently extolling vaccinations and castigating those who seek to protect themselves and their children.

When Ralph put up this opinion piece (which, by the way, that tattered document called the US Constitution allows him to do, through the First Amendment), his site WAS BLOCKED FOR FOUR DAYS AND LABELED AS "SPAM." He was informed by an anonymous Blogger email that he faces the possibility of the site being taken down permanently (for reasons unknown) in 20 (now 14) days. Ralph has, as you might imagine, reviewed all policy and information on the site and found that he did not violate any of Blogger's rules or regulations!

### **One Man's Truth is Another Corporation's Spam!**

Well, Ralph was informed, without any warning, that his site was now blocked; some information on the Blogger site says for 4 days, other suggests it might be two weeks. The block apparently happened on April Fools Day; he responded to the alleged robotic spam watcher on April 3<sup>rd</sup> and was told to wait 4 days while something or other happened to make it OK for his information to be on the internet again. (OK with whom? Who made this decision? You didn't, I didn't, the Editor of the New York Times probably didn't, the Supreme Court certainly did not -- so who did? And who makes all the other decisions about what gets censored?) It has now been 5 days and still, no "decision" from Blogger. When Natural Solutions Foundation has published articles or opinions about the pharmaceutical industry, BAM! -- our site goes down. We now have secure servers that we pay a good deal of money for, but who knows if they can withstand the next computer attack or, even worse, the next time our site is taken off the web by an unknown hand, the way Ralph's was.

### **What is spam? What is not permitted?**

IF the anonymous self-appointed? Government appointed? Monsanto appointed? Merck appointed? censors finally unblock Ralph's site (figuring, I assume, that he had been punished long enough to --- What? Learn a lesson? Be afraid?) what will the rules be? Will he be able to re-publish the article which was taken down? Who knows.

Well, right now the site is still there, but what he found was that his most recent post on the huge pharmaceutical lie that vaccines were safe and effective was so well written that it had to come down. That posting is the one we have put on our blog. Click [Here](#)

<http://www.healthfreedomusa.org/index.php?p=613>)

In the apparently offending blog, Ralph made reference to the Natural Solutions Foundation's Citizens Petition (a legal challenge) to the Federal Trade Commission asking them to use their authority to prevent any inaccurate information or advertising about the safety and effectiveness of vaccines. You can see the Petition [Here](http://www.healthfreedomusa.org/index.php?p=507) (<http://www.healthfreedomusa.org/index.php?p=507>). Interestingly, the FTC has now "lost" that legal document twice despite the fact that its delivery was certified by the United States Post Office. They appear to have no record of its receipt despite the official record provided by postal records. Here are the tracking numbers. Check them out: USPS Delivery Certification #0305 2710 0001 6184 2200 and 0305 2710 0001 6182 7672.

I must admit I am a little envious. You see, when the other side, the "THEY", attacks, we take it as guidance because it lets us know that we have hit a nerve - a nerve we know hurts them. We let these events guide us since they tell us that what we are doing is a waving a major red flag for them, exactly what THEY do not want us to do. Usually, Natural Solutions Foundation is the target of these attacks, but this time Ralph got the prize.

Ralph's blog is still blocked. He cannot post anything on it and the last blog, the one on the mysteriously twice-missing FTC Citizens Petition and the big vaccine lie, is simply gone, vanished, disappeared! So he cannot post on it and his article on the vaccine deception is gone!

The other side (whoever THEY are) frequently lets us know how well we are doing, and how very right on target we are by, for example, shutting down our site, blocking our links, greeting us (and only us!) at public Codex meetings with armed guards to keep us from talking with the other delegates to an open meeting. It is distressing at first, but, when you think about it, it tells us what they do NOT want us to do. So, of course, we take strength from that and do more of it!

If anyone doubts that the pharmaceutical companies know full well that they are lying about the safety and efficacy of vaccines, if you believe that they are the "THEY" or affiliated with the "THEY", it looks to me like they just provided us confirmation that we are saying exactly what they do not want you to know. By blocking the site, briefly unblocking it ("We know where your site lives and we can lock it or unlock it at whim, OUR whim, any time we want to!"), it looks like "THEY" are trying to send a message, the same one that they were trying to send when a person we believe to have deputized by the "THEY" climbed a telephone pole on our isolated and very remote street while we were in India, briefing its President on Codex. Once up there, they opened the protective insulation around a vital part of our communication system and removed it. The "THEY" deputy left the

insulation boot open and, when we finally did return, we found we that had neither phone nor internet (we don't have cable). The service man eventually climbed the pole and came down shaking his head: "Why would anyone do that?" he mused. The answer was pretty clear: "We know where you live!"

"Don't think", THEY seem to be saying, "That you have a prayer against us. We control everything, including your most potent tool, the Internet!"

### **Not So, and Not So Fast.**

We do not know who "THEY" are but we can make certain educated guesses about where they work and inferences based on what THEY do:

1. THEY care very much about the triumph of pharmaceutical medicine. To me, that suggests that THEY have intimate ties with Big Pharma (or are directly from Big Pharma?)

When I suggested in a Health Freedom eAlert I wrote that perhaps, just perhaps, the huge numbers of Americans dying from **properly used medications** might be no accident at all IF there is an agenda which includes getting rid of lots of people as profitably as possible, [www.HealthFreedomUSA.org](http://www.HealthFreedomUSA.org) and [www.GlobalHealthFreedom.org](http://www.GlobalHealthFreedom.org) both crashed within minutes due to a coordinated computer attack called a DDOS (Distributed Denial of Service). When our web master put up a temporary page about the situation, every one of the sites he serves as web-master for crashed within minutes, too. And our site is not on either of his servers!

2. THEY do not want you to think anything is amiss so you will eat and wear GM products. 90% of the US public does not want to eat or wear GM products so THEY have a solution: don't tell you. THEY certainly do not want you to know how GM impacts your life and the health of the biosphere. But now you know; you've known about Franken Food and you now know about Morgellon's Disease, perhaps the first nano-tech assault on your health. That may be why our eblasts so often get lost in cyberspace and why we are resending this important eblast on the Morgellon's threat. Please pass it along to everyone you know with a quick note asking them to join the [Health Freedom eAlert distribution list](http://www.healthfreedomusa.org/index.php?page_id=187) ([http://www.healthfreedomusa.org/index.php?page\\_id=187](http://www.healthfreedomusa.org/index.php?page_id=187))

That suggests that THEY have intimate ties with BIG Biotech (Monsanto, which went into business to make the dangerous artificial sweetener, saccharine, supplies 95% of the GM seeds in the world and is a huge drug company as well, making aspartame (following the acquisition of G. D. Searle, giving Donald Rumsfeld, Searle's then-president, large stock, stock options, etc., in the process). Monsanto makes now, or has made in the past (before it spun off another company to take the liability hits), a host of other

producer as well as a pharmaceutical giant.

So we've just created the Say NO! To GMO forum, for those Mouse Warriors who want to focus on GMO issues. Join: <http://groups.yahoo.com/group/no-genetically-modified-foods/join>

3. There is no questions that THEY do not want you and everyone else to know that vaccines not only do not work, they are a potentially lethal and a highly destructive factor in autism and a host of other diseases as well, some of them slow-growing like cancer, some of them rapid onset diseases like asthma. THEY are deeply interested in making sure that you submit to vaccination - to as many vaccines as possible. Because vaccines distort and compromise the immune system (both of the boys Jenner, the "father of vaccination", vaccinated died very young from those "treatments". One of them was his own son) information like that on Ralph's blog from credible sources would not be very welcome to THEM. Both Ralph and the Natural Solutions Foundation are highly credible sources of information. The Natural Solutions Foundation is, in fact, arguably the largest and most influential Health Freedom organization, certainly in the English speaking world. THEY apparently are not happy that when we speak what is, for them, an inconvenient truth, people listen.

That's one reason we sponsor the No Forced Vaccination forum, now nearly five hundred Mouse Warriors strong, focusing on vaccinations. Join here: <http://groups.yahoo.com/group/no-forced-vaccination/join>

So when Ralph makes seven league strides against the vaccination lies and campaign of misinformation, suddenly he goes from being a responsible attorney with decades of experience in the field of health freedom to a spammer, his site is blocked and he cannot enter, let alone edit, his blog. And his "offending" entry disappears!

In fact, Ralph's blog did a great job of laying out the vaccine lie for ordinary folks like you and me to understand the issues a little better. There is a lot of talk in a lot of quarters about vaccines and autism, vaccines and mercury, etc. But the Natural Solutions Foundation's FTC Citizens Petition is much more than a simple statement of information. It is a novel, and potentially highly effective, challenge to a branch of government which actually sometimes does protect citizens from corporate harm through the restriction of advertising and claims. Sometimes it errs badly, as with the matter of chelation therapy and the American College for the Advancement of Medicine. But sometimes, as with Big Tobacco, it sticks to its guns and used the power of the agency to restrict corporate dishonesty and damage. I believe that the reason that Ralph's blog was attacked because THEY are very much interested in not having this FTC action go forward with any momentum at all.

**But I Have News for Them: With Your Help It Will Have Plenty of**

## **Momentum!**

Could that be the reason that Ralph was told to submit the Natural Solutions Foundation Citizens Petition in hard copy, rather than by email, and, when he did, the result was the loss of the hard copy document? Despite the fact that we had USPS confirmation, via a tracking number, that the item was received, it was gone, POOF! -- lost in the ether. So, naturally, we solved the problem, we thought, by sending it again, also under registration. Electronic confirmation of its second delivery is quite clear. What is not clear is who, what, where, when, why it was interfered with.

The second copy of the document was again mysteriously lost, despite another tracking number! Hmmm. The arrival of the document at the FTC was announced in the missing blog. Did that give the anonymous "THEY" their opportunity to disappear our Citizens Petition? The lady in the FTC mail room says that she does not understand how this could have happened. Perhaps we do. You can read the letter Ralph has sent to his Senators and Representative in Congress about this mysterious disappearance at the bottom of the Petition posting. THEY probably do not work in the FTC mail room, but they apparently have tentacles which take them where they need to go.

4. THEY do not appreciate what the Natural Solutions Foundation is doing one little bit (this is the very best endorsement I could ask for, by the way). The Chairman of Codex, Dr. Claude Moshe, has chosen to violate protocol shockingly and attack us directly from the podium of the Codex Commission meetings in totally unprecedented statements. He also personally interfered with our sponsorship of an articulate and outspoken scientist from East Africa to the Codex meetings (open sponsorship is permitted under the Codex regulations: Nestles and other food giants do it all the time). THEY have significant influence with Codex and, with the help of the US, shape its policy both for the quite clearly intended consequence of food industry profits and the (perhaps) unintended consequence of preventable illness and death for most of the world's people. THEY are intimately associated with Codex.

All the previous posts on Ralph's Vitamin Lawyer Health Freedom Blog are still there but THEY (this time, the "little" THEY, "just" Blogger and Google) threaten to remove his entire blog in 20 (now 14) days. Why? See above.

## **The First Amendment to What? Which Constitution Did You Have In Mind?**

"It's just a goddamn piece of paper" says the "Decider" who had sworn to uphold it.

Wait a minute! What about the First Amendment? Yes. What about it? IF we are going to have a voice, any voice at all, we need to make sure that we

raise it now and keep it good and strong! Isn't it time we raised our voices in a roar so loud that no censor on the internet or the planet can muffle our voices? That means more, and more and more people joining the distribution list for the Natural Solutions Foundation hard hitting (punch after punch) Health Freedom eAlerts. Please join the alert; or if you are a member already, please, please, please get your family, friends and associates to join:  
[http://www.healthfreedomusa.org/index.php?page\\_id=187](http://www.healthfreedomusa.org/index.php?page_id=187)

Natural Solutions Foundation tells you about health and health freedom the way it is. And if we have to find another distribution channel, and another and another and another after that, we will. You can be sure of that!

### **Speaking truth to power!**

Natural Solutions Foundation: We ARE the voice of health freedom: We are the vocal chords that shout "Lie!" to what is a lie and "Bravo" when the truth is told. We ARE the voice that carries truth to parents who do not want to vaccinate their babies but have been told that they have to. WE are the deciding "THEY", not some anonymous group of shadowy corporate-and-beyond figures whose existence we are left to hypothesize!

Yours is the voice that shouts to the developing world, the world where just getting enough food to keep your heart and your brain capable of staying alive one more day is a task of almost overwhelming difficulty for millions of children and their families. Yours in the hand that supports the International Decade of Nutrition and its agricultural technology and sustainable farm and farm schools to give them information to feed themselves and their families well though safe, advanced techniques.

Your voice is a voice of reason in the chambers of Congress and you send us there with your dedication. It's your voice that is the effective voice of the health freedom movement at Codex. (We'll be there in a few weeks, by the way, right after we return from Africa).

So the moral of the story, boys and girls, is that little people can shape the world without billion dollar advertising budgets and deceit. Truth rings like a bell if you let it. And the reverberation is not in people's heads: it is in their hearts. That's where it reverberated first for you, isn't it? The head comes later (sometimes only a split second later, but it starts with the heart). "Little people", know a lot, as the street urchin in "Les Miserable" sings,

**Be careful as you go 'cos little people grow  
And little people know when little people fight,  
We may look easy pickings but we got some bite!  
So never kick a dog because it's just a pup  
You'd better run for cover when the pup grows up**

**And we'll fight like twenty armies  
And we won't give up!**

Lyrics by Shoenberg/Boubil

Right. WE, together, are little people changing the world. Your job is to be a Mouse Warrior and ride the Freedom Mouse for all it's worth, disseminate information, take action steps and recruit other little people into this Health Freedom Little People's movement. If that offends the powers that we know as "THEY", Good.

Actually, speaking of offending the powers that be, I'd like you to become a repeat offender and make a recurring donation to the Natural Solutions Foundation to keep our vital and unique pro health programs surviving and thriving. All of your donations are tax deductible so it's extra easy to give them: the US Government actually helps you! Please become a repeat offender by making a recurring donation now!

[http://www.healthfreedomusa.org/index.php?page\\_id=189](http://www.healthfreedomusa.org/index.php?page_id=189) .

Don't forget, THEY have essentially limitless sums of money available to them. We don't. Happily, we don't need it. We do, however, need funds for travel and research, funds to pay for people like our lawyer in Panama who is researching the law on setting up our Santa Clara ARC (so far, only good!) and we do need the funds for our outstanding video documentary on Health Freedom and the Codex agenda, to bring information to Congress, etc. We noted that we had received a very generous donation of \$25,000 to cover airfare. Yes, traveling to represent health freedom is that expensive.

Here is the itinerary for 3 people: Bangkok to San Francisco to New York to Benin to New York to Ottawa to New York to Panama to San Francisco to Panama to Geneva to San Francisco for 1 person

Bangkok to New York to Benin to New York to Ottawa to New York to Panama to San Francisco to Panama to San Francisco to Geneva to Bangkok for 2 people.

That is a lot of flying. In that trip, which will last about 3 months: there are two Codex meetings (Ottawa and Geneva), two International Decade of Nutrition meetings (Benin, Panama), a Health Freedom alliance meeting (San Francisco) and the first time, a demonstration community meeting (Panama), and others along the way in that itinerary.

That generous donation does not include a penny for hotels, food, ground transportation, etc. Repeat offenders needed!

So becoming a repeat offender makes a lot of sense and does a lot of good.

[http://www.healthfreedomusa.org/index.php?page\\_id=189](http://www.healthfreedomusa.org/index.php?page_id=189)

Thanks! I am proud to say I'm a repeat offender, so is Ralph and so is General Stubblebine. Mouse Warriors, hop on board!

There's a little people's movement taking off! And we are doing big things!

----- Here is the original eblast from April 2nd.

### **My God! What Have We Done?**

I watched a video clip this morning sent to me by a dear friend and colleague who knows a good video when she sees them because she makes documentary videos (and is our collaborator on our health freedom video project). I was struck with a sense of awe and speechless wonder at the sight presented: a self-aware being creating a self-portrait with assurance and aplomb. The being is an elephant. We think we know a great deal about animal psychology and are killing these majestic creatures with deadly efficiency and ferocity but, as this thrilling video shows, we know little or nothing about these astounding companions who share the earth with us. Will we learn who they are before we kill them all?

Click [here](http://www.youtube.com/watch?v=He7Ge7SogrK) ( <http://www.youtube.com/watch?v=He7Ge7SogrK> ) to share this video with me and be filled with wonder. If you are like me, you will also be filled with a profound sense of regret and sorrow for what we are doing to our planet and our fellow sentient beings.

Now think a moment about what we are doing to ourselves on this planet.

**Have you heard of the nightmare condition called [Morgellon's Disease](http://www.healthfreedomusa.org/index.php?p=599) ( <http://www.healthfreedomusa.org/index.php?p=599>)?**

Victims experience unbearable sensations - all the time, day and night - of insects crawling under their skin, burning and itching so terrible that people have committed suicide to end the torture. To make matters worse, much, much worse, these unfortunate people, who range in age from babies to the elderly, have open lesions on their skin that produces sharp, thin red, black, blue and white fibers and black sand-like grains. The fibers appear to move as

move and grow!

The origin of this horror has been unclear since it was first named in 2001 by the mother of a 3 year old baby whose symptoms she described and documented on a website. Since that time, thousands of people have been identified with this condition for which the only successful cure has been that most potent (and safe) of all antibiotics, nano silver. But the nature of the condition, and its cause, have remained a mystery until now.

### **This Plague Brought To You By BioTech**

When fibers from Morgellon's Disease lesions from numerous patients were analyzed by competent scientists, they were found to contain DNA from BOTH a fungus and a bacterium used in the production of commercial Genetically Modified plants and animals!

Merging organisms that have totally separate DNA and characteristics for the sake of profit, regardless of the health or other consequences, the line between animate and inanimate has been crossed.

**And we are all paying the price.**

Like the fictional Dr. Frankenstein, who transformed the non-living into a living creature which escaped his control, the biotech industry has, we fear, created a real Frankenstein's Monster: Franken Foods which are bringing new plagues on us and on the earth. The future of our planet is literally and truly at stake. That is why the Natural Solutions Foundation has taken on the task of educating decision makers about GM threats.

As our good friends and collaborators from the [Ecological Options Network](http://www.eon3.net/) (<http://www.eon3.net/>) have noted on their website, *"To survive in the world we have transformed, we must learn to think in a new way. As never before, the future of each depends on the good of all."* Statement of 100 Nobel laureates on the 100th anniversary of the Nobel prize

### **That's Our Table!**

Nine out of ten Americans already know that they do not want to eat GM foods but the FDA and other decision makers in the US and abroad do not necessarily get the message yet. After all, Big Biotech, like Big Pharma, has bought a seat at the Power Table in fact, some say they have bought the whole table. Well, we, the "netroots" -- the consumers, have a seat at the

table, too - in fact, it's our table! We want the food on it to be clean, wholesome and healthful. That's why we need your help to make sure this message is heard at every Codex meeting and in the halls of power around the world.

As it happens there is a Codex meeting coming up this month in Ottawa Canada where labeling of GM foods will be on the agenda, once again. For almost 20 years the US has been trying to force Big Biotech's Agenda down the throats (literally!) of the rest of the world. It has not been going well for the US.

The wonderful innovation in Codex proceedings that began at the last Codex Working Group on labeling of GM foods (Feb, Accra), when developing nations told the US that it can no longer dictate what happens to them and their health for the sake of the corporations who determine US policy (and who send advisors to sit on the US delegations of every Codex meeting), will be put to the test at the Codex Committee on Food Labeling (CCFL), April 28-May 2, 2008.

Natural Solutions Foundation will be there, reporting every day to tell you what's going on, straight from the shoulder. No other organization has the respect and cooperation of so many countries in the Codex community.

AFTER the CCFL meeting we will tell you all about the strategy meeting that we have helped initiate and its impact on the proceedings at CCFL. You can understand why we are not saying much about the who, what, when or where. The why is pretty clear: an emerging coalition of nations is taking their own power back to make it clear that their food and health- and yours, since so much US food is imported from the developing world - is not for sale. The US FDA, EPA and USDA may be for sale, but these countries actually value the health of their people so much that they will not permit GM foods in their countries or will only permit GM foods if clearly labeled as such. It remains to be seen how effective the developing nations are in their coalition strategy. We'll let you know!

The Natural Solutions Foundation will be there, supporting and assisting them and you'll have a ring-side seat.

But this is an expensive endeavor. In a few days we'll leave for Africa to meet with the officials in charge of food safety and our Agricultural Project to enhance crop production and nutrient density using magnets. Then, off to Benin where we meet with Father Godfrey Nzamuio, the Founder and genius behind the remarkable a UN Center of Excellence for Africa, the [Songhai Center](http://www.songhai.org/songhai_en/) ([http://www.songhai.org/songhai\\_en/](http://www.songhai.org/songhai_en/)), video at [www.YouTube.com/NaturalSolutions](http://www.YouTube.com/NaturalSolutions) our mentor on sustainable beyond-

project - see: (<http://www.NaturalSolutionsFoundation.org> ).

Next, we head to Ottawa for the 2008 meetings of the CCFL and the meetings around it that could change the course of Codex, then off to Panama to meet with people who are interested in becoming part of the Santa Clara Project. If you are interested in knowing more about the community To find out about how to become a participant, click (<http://tech.groups.yahoo.com/group/NSF-Panama/join>).

After that, we are off to the Codex Alimentarius Commission meeting in Geneva where each Codex committee reports on its work and moves it forward (or not - that's our opportunity!)

One of our supporters has generously donated \$25,000 to cover the cost of airfare for the three members of the Natural Solutions Foundation delegation on this trip. That is a wonderful start and we are deeply moved by their support. The trip will cost a lot more.

The 545 people who donated to the Natural Solutions Foundation during the month of March have our profound thanks! Without you, we could not continue our work. Moving forward is becoming easier because our footprint is larger in the health freedom world and in the developing world. We have been asked by the Codex Contact Points of two countries to work with them to establish Natural Solutions Foundation organizations in their countries!

But there are both on-going and special expenses we need your help to cover . Won't you make your tax-deductible [donation](http://www.healthfreedomusa.org/index.php?page_id=189) -( [http://www.healthfreedomusa.org/index.php?page\\_id=189](http://www.healthfreedomusa.org/index.php?page_id=189)) right now to make sure that your health and freedom have the voice and the vision that they deserve? Small donations add up. Big donations are wonderful. Whatever you can give, give! And thank you! And if you donate \$100 or more, we will count that as special help towards the funding of our documentary film on health freedom and the Codex agenda. Don't forget that every purchase you make at our outstanding online store, [www.Organics4U.org](http://www.Organics4U.org) helps to fund us and helps to keep you healthy. And you get a 40% tax deduction of the total price, too!

### **We Are There For You, Wherever That Takes Us**

The health freedom issues don't stop at Codex. They are larger than compulsory drugging or vaccination. They go beyond medical privacy. They include forced toxification with dangerous areal sprays, for example, or taking kids away when their parents won't medicate or vaccinate them.

When California and the EPA decided to spray for a non pest with chemicals

every 30 days for 5 years none the less, the Natural Solutions Foundation was rght there for you. To donate, click here ([http://www.healthfreedomusa.org/index.php?page\\_id=189](http://www.healthfreedomusa.org/index.php?page_id=189) )

In fact, you can take a look at my comments and General Stubblebine's at a meeting last month on the insane spraying of the Light Brown Apple Moth (LBAM) by visiting our webpage, [www.HealthFreedomUSA.org](http://www.HealthFreedomUSA.org) or our YouTube channel at [www.YouTube.com/naturalsolutions](http://www.YouTube.com/naturalsolutions) where you will find more information on the California spraying plan for that mythical pest, LBAM. While you are there, check out the amazing Songhai videos!

### **GM: the Most Expensive Cheap Food You'll Ever Eat**

GM food is cheap. It is grown under conditions that turn lush complex ecosystems once known as "farms" into monoculture (single crop) deserts. The very concept of integrated farming, where one plant or animal uses the waste of another and sustains the first one (or yet another) is meaningless in monoculture. Vast industrial techniques and huge government subsidies make GM food inexpensive and chemical additives keep the prepared and fast foods so easily available cheap, cheap, cheap.

Foods "rich" in GM ingredients and chemical substitutes for real flavors and components are poor in nutrition. But when you pick up a box of this or that or drive through a fast food lane, you don't tend to count the cost of that cheap food: cancers, cardiovascular disease, diabetes, stroke, Morgellon's Disease, potentially lethal allergies, infertility, depressed immunity, auto immune disease, poor school performance, depression, anxiety, worry about a loved one's illness or your own, doctor bills, hospital bills, lost days at work or school, etc. The "food" may be cheap, but the price you pay for eating or serving it is enormous.

To read a summary of the health concerns associated with GM foods, click here ( <http://www.healthfreedomusa.org/?p=600> ).

While the US is dedicated in its support of the deadly technology which produces "food" then-President George H. W. Bush declared -- without a shred of science to back him up -- to be identical to natural food, other countries are beginning to fear that they have made a terrible mistake in embracing GM technology. While the rest of the EU, for example, fears GM foods and ingredients, Romania, concerned about the damage to the environment and health, is considering ending its approval of GM food crops.

more. While the US approves GM sugar beets to provide you with [GM sugar](http://www.healthfreedomusa.org/index.php?p=585) ( <http://www.healthfreedomusa.org/index.php?p=585> ) later this year, the EU has blocked approval of a [GM potato](http://www.healthfreedomusa.org/index.php?p=587) ( <http://www.healthfreedomusa.org/index.php?p=587>) for this year's planting.

Australia, whose last Prime Minister could not wait to get as many GM crops into the ground as possible is seeing things a little differently now. Strong agitation is pressing the government there to delay approval of GM crops ( <http://www.healthfreedomusa.org/index.php?p=587>) until their safety has been tested and fairly evaluated.

When you go to a market that sells real, nourishing foods (perhaps your local farmers market) you do not hesitate to bear the extra cost of organic and wholesome foods. You know the hidden cost of cheap, factory-made Franken Foods is the health of your family.

Staples like taro in Hawaii, rice in Asia, soy and corn in the US have already been genetically modified. Papaya, peas, potatoes, pigs, they are all fair game for the GM boys (and girls). Never mind that species besides the crop which has been genetically modified are being contaminated - for example, us, through Morgellon's Disease. Insects, arguably significantly smarter than we are, have already figured out how to resist the super plants and their loads of super pesticides, becoming resistant and passing their resistance on to the huge levels of pesticide many plants are engineered to produce. In South Africa the Agricultural Research Council (ARC) has published trial results that indicate stalk-borer larvae have developed the ability to survive the Bt poison contained in GM maize [corn] plants. Click [here](http://www.healthfreedomusa.org/index.php?p=580) (<http://www.healthfreedomusa.org/index.php?p=580>) to read more.

But consumers who do not want to eat GM foods and do not want their word, or their bodies, contaminated by GM technology and its cataclysmic mistakes are on the march. In Hawaii, where taro is a staple food, consumers have gotten the State Legislature to consider a 10 year [moratorium on GM taro](http://www.healthfreedomusa.org/index.php?p=584) (<http://www.healthfreedomusa.org/index.php?p=584>).

It would be a good idea to make that march a quick step double time, too, because even the existence of clean food, certified organic, is threatened by the use of GM plants. That may be hard to imagine, but GM food spreads beyond its boundaries on wind and wheels and wings. The continued availability of components to make organic foods, which are grown without pesticides, artificial fertilizers, genetically modified components or other food-born toxins is in question.

genetically engineered varieties is threatening the purity of organic and natural food products and driving purveyors of such specialty products to new efforts to protect their markets.

Read more (<http://www.healthfreedomusa.org/index.php?p=588>). This is particularly remarkable when you consider that although most countries allow a 0.9% contamination level of GM components in organic products, the US allows a shocking 10% contamination in certified organic foods. So if products which are 90% free of GM crops are increasingly hard to come by, what does that say about the urgency of the situation for those of us who do not want to undergo forced drugging by toxic components or Franken Foods?

### **Ready to Get Involved?**

I hope you are now good and steamed and looking for an outlet for your outrage (justified) at a system which actively prohibits labeling of GM foods because it (the FDA) knows that you will reject GM foods so they make it a crime to tell you if your foods are genetically modified.

Join the Natural Solutions Foundation **Say NO! to GMO** forum and become part of a community ready for action. Visit <http://groups.yahoo.com/group/no-genetically-modified-food/> to become a member of the forum.

And, most importantly, get everyone you know to join as well. If ever netroots had a part to play in shaping policy, now is that time. And if ever the timeline before the tipping point into environmental disaster was close enough to take action without waiting any longer, now is that time, too.

We need to force the FDA to REQUIRE labeling of GM foods, not forbid it, to hold hearings on the safety (really, the lack thereof) of GM foods for the environment and for people, to make all corporate information submitted to the FDA about GM foods and non-food crops public, to find out what the USDA knows and does not know about the pharmaceutically modified crops it has lost control of, according to an internal audit of its Pharma modified crop test plantings, etc. And we need to do it quickly.

We need to get GM foods out of schools, hospitals, and off our tables, and we need to do it now!

GM is the problem, but WE, yes, WE! Are the answer!

### **Featured Film**

Cindy Sage and the BioInitiative Report: Biological Standards for Microwave. Click

(<http://blip.tv/file/597424>) to view this important film. Be prepared to be

shocked if you think your cell phone (or your kid's cell phone) is safe to use!

We know there are a number of other health freedom issues that that excite your ire. Chief among these is the continuing story of mandated vaccinations. You can follow some of those developments at my co-trustee, Ralph Fucetola JD's blog. Click here:

<http://vitaminlawyerhealthfreedom.blogspot.com/2008/03/media-blitz-supports-big-pharma.html>

There will be more about these issues in future eAlerts!
